PROFESSIONAL PROFILE

Seasoned cybersecurity professional with a proven track record of strengthening the confidentiality, integrity, availability, authenticity, and non-repudiation of enterprise systems by leading and deploying mission-critical initiatives that mitigate systemic information security risk and maximize network resilience. Proficient in defensive cyber operations, web application security, cloud infrastructure assessment, vulnerability management, and incident response and threat intelligence. Skilled at reengineering core cyber, technology, and data processes and baselining, redesigning, and realigning them to strengthen security architectures, streamline operations, and accelerate digital transformation. Adept at translating complex internal and external data into clear, actionable insights that drive informed decision- and policy-making. Collaborate with stakeholders at every organizational level to navigate critical challenges, surface emerging opportunities, and turn systemic complexity into solutions that produce measurable information security outcomes and long-term value.

CORE COMPETENCIES

- Vulnerability and Risk MGT
- Cyber Incident Response
- Defensive Cyber Operations
- IT Project Portfolio MGT
- Agentic/Robotic/Business Process Automation
- Ethical Hacking
- Cyber Threat Intelligence
- IT Security Strategy and Policy MGT
- Data Analytics

PROFESSIONAL WORK EXPERIENCE

Consumer Financial Protection Bureau (CFPB), Washington, DC | Jan 2017 – Present

Cybersecurity Operations Specialist | Jul 2022 – Present

Strengthen Bureau cybersecurity posture by supporting the Chief Information Security Officer (CISO) Cybersecurity Operations (CyberOps) leadership through leading and coordinating technical and operational projects and reducing system vulnerabilities to bolster network resilience.

- Monitor and remediate internal vulnerabilities and misconfigurations, leveraging cyber threat intelligence to anticipate exploits and prevent, detect, and mitigate network and hardware breaches thereby reducing the agency attack surface and increasing infrastructure asset visibility using Qualys, Anomali, Axonius, Burp Suite, and CrowdStrike Falcon, and frameworks including MITRE ATT&CK, Cyber Kill Chain, NIST CSF, MITRE CVE/CWE, and FIRST CVSS.
- Lead cross-functional IT teams on cybersecurity implementation projects (SDLC/Agile), supporting CyberOps initiatives including the DOJ SOCaaS platform transition and external pen-testing coordination to identify attack vectors and drive risk mitigation.
- Lead development and lifecycle management of cybersecurity governance playbooks (e.g., incident response and recovery), driving standardization and compliance with federal and Bureau IT requirements.
- Direct cybersecurity procurement and financial management, including market research, proposal evaluation, FedRAMP compliance, contractor performance oversight, and budget planning and monitoring for CyberOps.
- Develop policy-driven recommendation memos for senior IT executives, synthesizing federal IT security policy to support strategic decision-making and approvals.

Management and Program Analyst | Jan 2017 – Jun 2022

Supported the Supervision, Enforcement and Fair Lending (SEFL) leadership across multiple roles, driving core projects and initiatives to strengthen operational, technical, and organizational performance.

- Led enterprise-wide programs, projects, and processes end-to-end (baseline through closeout), including process improvement, business intelligence, data analytics, organizational development, IT application development, and workforce sustainment to achieve strategic business outcomes.
- Managed internal review and transmission of SEFL-authored public-facing documents, ensuring consistency, accuracy, and transparency of Bureau messaging.

- Spearheaded playbook development, quality control, and standardization for new and existing operational playbooks.
- Maintained weekly budget and project dashboards in Tableau to inform senior management decision-making.
- Ensured compliance with Federal Reserve Office of Inspector General recommendations by assessing supervision examination software (Salesforce) and network access, and developing ongoing technology access review procedures.

Integrated Systems, Inc. (ISI) — Business Process Reengineering Analyst (Contractor), Washington, DC | 2016
Supported Securities and Exchange Commission's (SEC) Office of Information Technology (OIT) SDLC transformation from current to future state, serving as team process SME for business process maps and narratives.

- Analyzed and revised process narrative actors and activities to deploy new and existing SDLC narratives and maps using Visio.
- Created a prototype SDLC SharePoint site to centralize process documentation using SharePoint Designer.
- Developed a training platform in Adobe Captivate to help project managers navigate the new SDLC process.
- Ensured compliance with enterprise architecture directives by converting the future-state SDLC process map into BPMN 2.0 standards using Visio.
- Created UML-based use case models to support requirements development for a new SDLC software automation tool.

Cognizant Technology Services — Consultant (Contractor), Arlington, VA | 2015

Reinforced Assurant's procedural compliance by analyzing, documenting, revising, and deploying internal controls process narratives and maps.

- Facilitated virtual sessions with stakeholders to research, analyze, and revise process narratives and maps (actors, activities, systems, controls) for financial and operational current-state processes using Visio.
- Observed and documented on-site "As-Is" mobile device restoration and disposition processes, ensuring full process transparency.

Cigna — Business Process Engineer (Contractor), Arlington, VA | 2014 – 2015

Supported migration to and integration of a future-state ERP healthcare insurance system from disparate legacy systems by analyzing, developing, and deploying system process flows and change impact evaluations.

- Facilitated virtual sessions with stakeholders to model and deploy "As-Is" and "To-Be" process maps for product, benefit, and client configuration using modified BPMN 2.0 and BlueWorks Live, driving business requirements alignment and establishing level of effort for requirements architecture.
- Analyzed and decomposed business requirements into business rules to support IT system-action determination.

ICMA-RC — Analyst (Contractor), Washington, DC | 2013

Enhanced the IT group's operational efficiency, serving as internal process thought leader in researching best practices and developing, deploying, and maintaining policy, standard, and procedural artifacts across the IT domain.

- Researched best practices to classify, streamline, and deploy group policies, standards, and procedures into a new documentation framework — using Excel for structure, Word for procedure narratives, and Visio for process maps.
- Led client-facing discussions with process owners to develop and deploy user-friendly work process guidelines and templates, standardizing IT enterprise capture of SDLC business, technical, and non-technical requirements.

Deloitte Consulting LLP — Business Process Reengineering Analyst (Contractor), Alexandria, VA | 2012 – 2013
Supported enterprise-wide implementation of the Naval Justice Information System (NJIS), a case-management and workflow-tracking platform, for DON PEO-EIS Sea Warrior Program (PMW 240).

- Conducted gap analysis of data transferred across naval law enforcement communities to ensure compliance with congressionally mandated reporting requirements.
- Facilitated client-facing working sessions with process owners and stakeholders to assess change impacts and identify information-transfer gaps across actors, activities, systems, and workflows.
- Designed and deployed enterprise-wide “As-Is” and “To-Be” business process maps in BPMN 2.0 using iGrafx, defining current- and future-state process data inputs and outputs.

Leidos (f/k/a Science Applications International Corporation (SAIC)) — Senior Business Process Analyst, McLean, VA | 2011 – 2012

Supported the Department of State (DOS) Bureau of Information Resource Management (IRM) Vanguard 2.2.1 transformation from current to future state through the streamlining and consolidation of numerous IT processes.

- Standardized project process improvement operations by authoring business process templates in Word.
- Reduced performance management data collection cycle time by leveraging a new SharePoint-based tool that automated collection and centralized data storage.
- Monitored subcontractor compliance against monthly contract financial and nonfinancial performance goals, ensuring receipt of maximum contractual incentive revenue.

Booz Allen Hamilton (BAH) — Senior Consultant, McLean, VA | 2010 – 2011

Supported the Department of the Air Force (DAF) A7C Civil Engineer transformation from current to future state through development, maintenance, and deployment of business process maps and narratives.

- Constructed, deployed, and revised “As-Is” business process maps in Visio synthesizing interlinked actors, activities, and information to determine capability requirements for a military base housing management IT system.
- Developed and maintained online business process guidebooks and maps in Visio, providing the client with standardized, centrally located operating procedures.
- Managed all IT-related activities between the process project team and IT.

Federal Energy Regulatory Commission (FERC) Washington, DC | 2002 – 2010

Energy Industry Analyst | 2005 – 2010

Enforced regulatory compliance with financial and operational filing requirements through oversight of a 200-entity oil pipeline and centralized service company portfolio.

- Led design, end-user testing, and deployment of submission software using an SDLC framework, reducing filing costs by a projected 10%.
- Validated and analyzed submitted financial, operational, and transactional data using SQL, Access, and Excel.
- Collaborated in real time with an oil pipeline trade association to ensure proper dissemination of regulatory developments and conveyed association feedback to Commission senior staff.

Organizational Process Consultant (Detailee) | 2004 – 2005

Achieved conformity with the Paperwork Reduction Act (PRA) of 1995 by revamping agency-wide current-state information assessment processes and restructuring existing reporting requirements.

- Appraised current-state information requirements through gap analysis, interfacing with internal and external stakeholders to evaluate the effectiveness of collected data and the efficiency of “As-Is” collection and disposition processes.
- Interfaced with federal agencies to formulate best practices for institutionalizing an agency-wide organizational model and processes for assessing current and future information requirements.
- Baseline and mapped core processes in Visio; delivered “To-Be” organizational design and process options in PowerPoint; defined roles and responsibilities for key positions; and deployed an implementation plan to transition the agency from current to future state.

Public Affairs Specialist (Detailee) | 2003 – 2004

Redesigned Commission website and resolved public inquiries in a timely manner.

- Benchmarked best practices to improve website usability and visibility.
- Interfaced with internal stakeholders to raise project awareness and solicit input on site design and content.
- Developed content across multiple areas to ensure easy access to information.
- Responded to ~50 public inquiries daily via email and phone, assisting external users in accessing Commission-related information.

Accounting Policy Analyst | 2002 – 2003

Researched and assessed accounting issues affecting energy companies, recommending courses of action to anticipate industry direction and practices.

- Developed and delivered training on the potential impact of Sarbanes-Oxley legislation shortly after its introduction.
- Evaluated proposed certificates of public convenience for energy companies seeking to construct U.S. natural gas terminals and pipelines, analyzing financial statements.
- Advised energy companies on Commission accounting regulations.

TECHNICAL COMPETENCIES

Cybersecurity Frameworks & Standards

- Risk & Control Frameworks: NIST CSF, NIST SP 800-37 (RMF), NIST SP 800-53, NIST FIPS 199, ISO/IEC 27001/27002, ISACA COBIT
- Incident Response: NIST SP 800-61, ISO/IEC 27035, SANS Incident Response Framework
- Threat & Vulnerability Models: MITRE ATT&CK, Lockheed Martin Cyber Kill Chain, MITRE CVE/CWE, FIRST CVSS
- Architecture & Workforce Models: CISA Zero Trust Maturity Model, NIST SP 800-181 (NICE Framework)

Regulatory & Compliance

- Cybersecurity Maturity Model Certification (CMMC) 2.0, PCI DSS, US FISMA, EU GDPR, Executive Order 14028
- FAA Part 107 (Unmanned Aircraft Systems Operations)

Security Tools

- Penetration Testing: Kali Linux, Metasploit, Burp Suite, OWASP ZAP
- Networking & Protocols: OSI Model, TCP/IP Model, Wireshark, Nmap, Snort
- Vulnerability Management: Qualys
- Threat Intelligence: Anomali ThreatStream
- Asset Management: Axonius
- Endpoint Detection & Response: CrowdStrike Falcon
- SIEM & Data Pipeline: Splunk, Cribl

Development & Automation

- Languages & Scripting: Python, SQL, PowerShell, VBA
- AI & Process Automation: Claude, Claude Cowork, Microsoft Power Automate
- Development Tools: Visual Studio Code, Visual Studio, GitHub
- Cloud: AWS

Enterprise Platforms

- IT Service Management: ServiceNow
- Project Management: Jira, Microsoft Project
- Business Process Management: IBM BlueWorks Live, iGrafx
- Data Analytics & BI: Tableau
- Experience Management: Qualtrics
- CRM: Salesforce
- Human Capital Management: SAP SuccessFactors

MILITARY EXPERIENCE

United States Army (USA) — Active Duty, Honorable Discharge, Specialist (E-4)

- MOS 13R, Field Artillery Firefinder Radar Operator | 1992 – 1996

EDUCATION

University of Texas at San Antonio (UT San Antonio) — Carlos Alvarez College of Business, San Antonio, TX

- University of Texas (UT) System Online Master of Business Administration (MBA) | 2004
- Bachelor of Business Administration (BBA), Accounting | 2001
- Bachelor of Business Administration (BBA), Finance | 2001
- Bachelor of Business Administration (BBA), Management, International Business Concentration | 2000
