PROFESSIONAL PROFILE

Seasoned cybersecurity professional with a proven track record of optimizing system confidentiality, integrity, availability, authenticity and non-repudiation by leading mission-critical initiatives to protect enterprise assets, reduce risk exposure and maximize network resilience. Proficient in cybersecurity operations, web application security, cloud infrastructure assessment, vulnerability management and incident response & threat intelligence. Adept at reimagining and reengineering core cyber, technology and data processes, integrating baselining, redesign, and realignment to strengthen security architectures, streamline technical operations and accelerate digital transformation. Expert in sourcing, evaluating, and translating complex internal and external data into clear, actionable insights that drive informed decision and policy-making processes. Known for collaborating across all organizational levels to navigate pivotal challenges, uncover emerging opportunities, simplify systemic complexity, and engineer innovative solutions that deliver measurable information security strategic outcomes and long-term value.

- Vulnerability and Risk MGT
- IT Project Portfolio MGT
- Cyber Threat Intelligence
- Cyber Incident Response
- Cybersecurity Governance
- Agentic/Robotic Process Automation
- Ethical Hacking
- IT Security Strategy and Policy MGT
- Data Analytics

PROFESSIONAL WORK EXPERIENCE

Consumer Financial Protection Bureau (CFPB), Washington, DC

Jan 2017 to Present

Cybersecurity Operations Specialist

Jul 2022 to Present

Support the Chief Information Security Officer (CISO) Cybersecurity Operations (CyberOps) leadership by reinforcing network resilience through leading, managing and supporting technical and operational projects and through identifying, monitoring and reducing system vulnerabilities to fortify Bureau cybersecurity posture.

- Monitor and resolve ongoing internal system vulnerabilities & configurations and evaluate current cyber threat intelligence to anticipate potential system exploits and prevent, detect and mitigate network and hardware breaches by reducing agency threat & attack surfaces and increasing network infrastructure asset visibility by utilizing tools to include Qualys, Anomali, Axonius, Burp Suite and CrowdStrike Falcon, utilizing TTP frameworks like MITRE ATT&CK, LM Cyber Kill Chain and NIST Cybersecurity Framework and utilizing vulnerability frameworks like MITRE CVE/CWE and FIRST CVSS.
- Define, lead and coordinate IT cross-functional teams for various cybersecurity application implementation projects utilizing frameworks like SDLC and Agile to assist CyberOps in achieving strategic cybersecurity operational and technical initiatives like the transition to the DOJ Security Operations Center-as-a-Service (SOCaaS) platform and coordination of external pen-testing activities to assess, identify and demonstrate attack vectors and their impacts to provide risk mitigation and remediation strategies.
- Lead end-to-end development of new and lifecycle management of existing cybersecurity operations governance, technical and functional process, protocol, policy and procedural playbooks like incident response and recovery driving standardization and adherence to Federal and Bureau IT compliance requirements.
- Direct cybersecurity procurement and financial management processes to include conducting market research, reviewing proposal bids, ensuring software is FedRAMP-compliant, executing cybersecurity contractor-facing contract technical and performance oversight and evaluation and developing CyberOps future budget proposals and monitoring ongoing expenditures against current budget.
- Produce policy-driven recommendation and information memos for senior Bureau IT executives synthesizing various federal IT security policies to support strategic cybersecurity decision-making and procedural approvals.

- Manage CyberOps SharePoint site to ensure centralized nexus for cybersecurity operational and technical knowledge management.

Management and Program Analyst

Jan 2017 to Jun 2022

Supported the Supervision, Enforcement and Fair Lending (SEFL) leadership by leading and supporting ongoing core projects and initiatives to strengthen operational & organizational performance and information systems access compliance in various positions.

- Led from project baseline and scoping to closeout various concurrent core enterprise-wide business, financial and technology portfolio of programs, projects, products, and processes to include operational process improvement, business intelligence, data analytics, organizational development, information technology application development and workforce sustainment to achieve strategic and business goals and outcomes.
- Managed transmission of all SEFL-authored public-facing documents to various internal Bureau staff for their review in order to ensure the consistency, accuracy, and transparency of Bureau's message.
- Spearheaded new playbook development, update & quality control review processes and develop & maintain new & existing current- state playbooks to ensure process standardization and prominence.
- Maintained budget and project intelligence dashboards utilizing Tableau on a weekly basis to visualize data to inform senior management decision-making.
- Ensured compliance with Federal Reserve Office of Inspector General report recommendations by conducting assessments of supervision examination software (Salesforce) & network access and developing & maintaining technological access policy review procedures on a continual basis.

Integrated Systems, Inc. (ISI)

Apr 2016 to Nov 2016

Business Process Reengineering Analyst (Contractor)

Washington, DC

Supported the Securities and Exchange Commission (SEC) Office of Information Technology (OIT) ongoing SDLC transformation effort from current state to future state by serving as team process SME in developing, maintaining and deploying business process maps & narratives.

- Analyzed, synthesized, reviewed and revised process narrative actors and activities as to deploy new and existing SDLC process narratives and maps utilizing Visio and Word.
- Created prototype SDLC SharePoint site to centralize and exhibit all process documentation utilizing SharePoint Designer.
- Developed training platform to assist Project Managers in navigating the new SDLC process utilizing Adobe Captivate.
- Ensured compliance with enterprise architecture directive by converting future-state SDLC process map into BPMN 2.0 model standards utilizing Visio.
- Created UML-based Use case models to assist in requirements development for new SDLC software automation tool.

Cognizant Technology Services

Jun 2015 to Dec 2015

Consultant (Contractor)

Arlington, VA

Reinforced Assurant's procedural compliance by analyzing, documenting, revising and deploying internal controls process narratives and maps.

- Facilitated virtual process sessions with internal process owners and stakeholders to research, analyze, collect, synthesize, review and revise process narrative actors, activities, information systems and controls as to deploy new and existing financial and operational current state internal control process narratives and maps utilizing Visio.
- Observed and captured on-site client "As-Is" mobile device restoration and disposition processes ensuring 100% process transparency.

Cigna

Jan 2014 to Mar 2015

Business Process Engineer (Contractor)

Arlington, VA

Supported the migration to and integration of future state enterprise resource planning healthcare insurance software from current state disparate legacy enterprise software systems through the analysis, development,

capture, change impact evaluation, alignment and deployment of system process flows.

- Facilitated virtual process sessions with internal process owners and stakeholders to research, analyze, collect, synthesize, review and revise interlinked process map actors, activities, information, systems and workflow as to model and deploy “As- Is” and “To-Be” processes for product, benefit and client configuration functional process maps utilizing modified BPMN 2.0 and Blue Works Live that drove development and alignment of business requirements.
- Facilitated virtual process sessions with internal process owners and stakeholders to research, analyze, collect, synthesize, review and revise interlinked process map actors, activities, information, systems and workflow as to baseline and deploy banking function “As-Is” process models utilizing modified BPMN 2.0 and Blue Works Live that escalated functional visibility and established level of effort needed for requirements architecture.
- Analyzed and decomposed business requirements into business rules that supported IT determination of system actions.

ICMA-RC

Feb 2013 to Jun 2013

Analyst (Contractor)

Washington, DC

Enhanced the IT group’s operational efficiency by serving as internal process thought leader in researching best practices, analyzing, documenting, revising, deploying and maintaining policy, standard and procedural process artifacts across IT domain.

- Researched best practices, analyzed, classified, categorized, streamlined and deployed new and existing incongruent group policies, standards and procedures into new strategic documentation framework utilizing Excel.
- Researched best practices, analyzed, authored, modernized, deployed and maintained policies, standards and procedures narratives utilizing Word and diagrammed corresponding business process maps utilizing Visio.
- Led client-facing group discussions with internal process customers and owners to identify, collect, develop, model, review, deploy and update user-friendly template work process guidelines, actors, activities, and controls according to client business process requirements for standardizing IT enterprise capture of SDLC business, technical and non-technical requirements utilizing Word.

Deloitte Consulting LLP

Jun 2012 to Jan 2013

Business Process Reengineering Analyst (Contractor)

Alexandria, VA

Supported the Department of Navy (DON) PEO-EIS Sea Warrior Program (PMW 240) Naval Justice Information System (NJIS) software case-management and workflow-tracking enterprise-wide ongoing implementation effort by ensuring congruency with legislative-mandated reporting directive through the gap analysis of data transferred between naval law enforcement communities.

- Arbitrated client-facing process meetings with internal process owners and stakeholders to research, analyze, collect, synthesize, evaluate change impacts and revise interlinked process map actors, activities, information, systems and workflow as to articulate and evaluate information transfer process gaps for the diagramming and deployment of enterprise-wide “As-Is” and “To-Be” business process maps utilizing BPMN 2.0 and iGrafx that determined current-state and future-state process data inputs and outputs.

Leidos (formerly Science Applications International Corporation (SAIC))

2011 to 2012

Senior Business Process Analyst

McLean, VA

Supported the Department of State (DOS) Bureau of Information Resource Management’s (IRM) Vanguard 2.2.1 project ongoing transformation effort from current state to future state through the streamlining and consolidation of numerous IT processes.

- Homogenized project process improvement operations by authoring business process templates utilizing Word.
- Minimized performance management data collection cycle time by leveraging new SharePoint-based tool that automated data collection process and centralized data storage.

- Monitored continual compliance of subcontractors against monthly contract financial & nonfinancial performance goals that ensured receipt of maximum contractual incentive revenue.

Booz Allen Hamilton (BAH)

2010 to 2011

Senior Consultant

McLean, VA

Supported the Department of the Air Force (DAF) A7C Civil Engineer ongoing transformation effort from current state to future state through development, maintenance and deployment of business process maps & narratives.

- Researched, analyzed, collected and synthesized interlinked process map actors, activities and information to construct, deploy and revise “As-Is” business process maps utilizing Visio that determined capability requirements for development of military base housing management IT system.
- Developed and maintained online business process guidebooks and maps utilizing Visio that provided client with standardized, centrally-located and accessible operating procedures.
- Managed all IT-related activities between the process project team and IT.

Federal Energy Regulatory Commission (FERC), Washington, DC

2002 to 2010

Energy Industry Analyst

2005 to 2010

Enforced regulatory compliance with financial and operational filing regulations through oversight/management of 200 oil pipeline and centralized service company portfolio.

- Led the design and end-user testing and deployed submission software utilizing SDLC framework which resulted in reducing filing costs by projected 10%.
- Validated and dissected submitted financial, operational and transactional data utilizing SQL, Access and Excel.
- Collaborated with oil pipeline trade association on real-time basis that ensured proper dissemination of regulatory developments and conveyed association feedback to Commission senior staff.

Organizational Process Consultant (Detailee)

2004 to 2005

Achieved conformity with the Paperwork Reduction Act (PRA) of 1995 through the revamp of agency-wide current-state information assessment processes and restructuring of existing information reporting requirements.

- Appraised current-state organizational information requirements by identifying and interfacing with internal and external stakeholders to investigate functional effectiveness of existing collected data and efficiency of “As-Is” data collection and disposition processes through gap analysis.
- Interfaced with various federal agencies and formulated best practices for institutionalizing agency-wide organizational model and processes for assessing current and future information requirements.
- Baselined and mapped integral core processes utilizing Visio, delivered “To-Be” organizational design and process options utilizing PowerPoint, defined roles and responsibilities for key positions and deployed implementation plan to transition agency from current state to future state.

Public Affairs Specialist (Detailee)

2003 to 2004

Redesigned Commission website and resolved public inquiries in a timely manner.

- Benchmarked best practices for improving website usability and visibility.
- Raised awareness of the project and solicited input for the site’s design and content by interfacing with various internal stakeholders.
- Developed content for various areas to ensure ease-of-use in accessing information.
- Responded to approximately 50 public inquiries daily via e-mail and telephone and assisted external website users in accessing Commission-related information.

Accounting Policy Analyst

2002 to 2003

Researched and assessed accounting issues that affected energy companies, suggesting courses of action to anticipate energy industry’s direction and practices.

- Conducted training on potential impact of Sarbanes-Oxley legislation when originally introduced.

- Evaluated proposed certificates of public convenience for energy companies seeking to construct natural gas terminals/ pipelines in the U.S. by analyzing financial statements utilizing Excel.
- Counseled energy companies on Commission accounting regulations.

PROFESSIONAL CERTIFICATIONS

- CompTIA Security+ 2024
- Project Management Institute (PMI) Project Management Professional (PMP) 2018

TECHNICAL SKILLS

- **UAS Policy:** FAA Part 107
- **Cybersecurity Policies, Frameworks and Standards:** MITRE ATT&CK, LM Cyber Kill Chain, NIST CSF, MITRE CVE/CWE, FIRST CVSS, ISACA COBIT, SANS IRF, CISA ZTMM, NIST SP 800-61 IRL, NIST SP 800-53, NIST SP 800-181/NICE, NIST SP 800-37/RMF, NIST FIPS 199, DOD CMMC 2.0, PCISSC PCI-DSS, ISO 27001/27002, ISO 27035, EO 14028, EU GDPR and US FISMA
- **Cybersecurity Ethical Hacking/Pen Testing:** Burp Suite, Kali Linux, Metasploit Framework, Nmap, Snort, Wireshark and OWASP ZAP
- **Cybersecurity Vulnerability MGT:** Qualys
- **Cybersecurity Threat Intelligence:** Anomali Threatstream
- **Cybersecurity Asset MGT:** Axonius
- **Cybersecurity EDR:** CrowdStrike Falcon
- **Cybersecurity SIEM/SOAR:** Splunk and Cribl
- **IDE:** Visual Studio Code and Visual Studio
- **Scripting and Agentic/Robotic Process Automation:** Python, SQL, PowerShell, Power Automate and VBA
- **LLM:** Claude and Copilot
- **Code MGT:** GitHub
- **Cloud MGT:** AWS
- **IT Service MGT:** ServiceNow
- **Project MGT:** Jira and Project
- **Process MGT:** Visio, Blue Works Live and iGrafx
- **Data MGT:** Tableau and Excel
- **Database MGT:** Access
- **Experience MGT:** Qualtrics
- **Customer Relationship MGT:** Salesforce
- **Human Capital MGT:** SAP SuccessFactors
- **Content MGT:** Publisher and Adobe Captivate
- **Knowledge MGT:** SharePoint and SharePoint Designer

MILITARY EXPERIENCE

United States Army (USA), Active Duty, Honorable Discharge, Specialist (E-4)

- MOS 13R Field Artillery Target Acquisition Radar Operator 1992 to 1996

EDUCATION

University of Texas at San Antonio (UTSA) Carlos Alvarez College of Business, San Antonio, TX

- University of Texas (UT) System Consortium Online Master of Business Administration (MBA) 2004
- Bachelor of Business Administration (BBA) in Accounting 2001
- Bachelor of Business Administration (BBA) in Finance 2001
- Bachelor of Business Administration (BBA) in MGT with International Business Concentration 2000
